

Code for the Design, Construction and Operation of Hire Boats – Stability:

Boats which are let for hire must have a completed Stability Compliance Declaration upon entry into hire service and recertification if significant alterations affecting stability of the boat are made during its life.

Changes affecting the stability of the boat and requiring reassessment include:

- Change in mass or distribution of mass for example an engine change, fitting of new fuel tanks or additional equipment
- Structural change
- Change to crew area
- Change in area of operation
- An increase in the maximum number of persons to be carried

If this schedule is incorrect please amend or add new details as required.
